

Project Design Phase-I Solution Architecture

Date	16 october 2022
Team ID	PNT2022TMID51645
Project Name	Smart fashion recommender application
Maximum Marks	4 Marks

Solution Architecture:

The Fashion Recommendation System is mainly used to recommend the best possible outfit combination to a user who has no fashion sense based on their wardrobe. It may not always provide the best possible outfit to wear for an occasion as the system is dependent completely on the clothes present in the users wardrobe. Also another reason is that fashion is highly inculcating a fashion sense among the users and can provide the best implemented as a website, it is very easy for the end users to access as well as use. The scope of this system can be expanded by including the ability to detect the various design and patterns on clothing, and to increase the number of occasions
